Aung Kyaw Moe

Full Stack Developer | PHP & Laravel

Yangon, Myanmar | akyawmoe394@gmail.com | github.com/akm-2112

PROFILE

Full Stack Developer focused on PHP and Laravel. Design booking workflows, database schemas, and APIs, and support production systems for pricing, reservations, and third-party integrations.

PROFESSIONAL EXPERIENCE

GMBF Group Pte. Ltd. | Full Stack Developer | Jan 2026 - Present

- Shipped dynamic seat pricing for a production bus booking platform. Delivered seat-zone selection and server-side pricing for seat holds, ticket changes, and reseller commissions while preserving base fares for legacy seat plans.
- Own the architecture, relational schema, and API design for a hotel booking module in development. Guide implementation of nightly inventory, quotes, holds, and confirmation, using MySQL row locks and idempotent booking requests.
- Contributed to the production upgrade of a bus ticketing platform from Laravel 6 to 13 on PHP 8.4. Rehearsed the OAuth schema migration and resolved compatibility issues in API authentication and mobile ticket changes.
- Built vehicle availability, reservation, and payment workflows for car rental, including booking and payment APIs for a third-party mobile wallet mini app. Added PHPUnit regression coverage for bus promotion validation.
- Optimized booking archive and seat lookup queries with composite MySQL indexes and used Eloquent eager loading to avoid per-row queries in archive lists.

Hotel Booking Platform | Freelance Laravel Developer | 2026

- Delivered a production integration with an international hotel inventory API. Added web checkout, booking confirmation polling, and admin cancellation alongside the existing local hotel booking flow.
- Fixed supplier-to-local currency conversion in room pricing and built export tooling to prepare booking and cancellation evidence for supplier certification.

TECHNICAL SKILLS

Backend PHP 8.4, Laravel, OOP, MVC, Eloquent ORM, REST APIs, JSON

Data and access MySQL, schema design, migrations, indexing, transactions, Passport, authorization

Integrations Payment gateways, mobile wallet mini apps, hotel supplier APIs

Testing and tools PHPUnit, Composer, Git, Postman, Linux, Apache

Languages Burmese, English
